MEMORANDUM FOR: DMO-PP&C(Mike Warner)  
 FROM: Environmental Protection Officer  
 SUBJECT: Trial Burn

1. The Trial Burn at the Deactivation Furnace will require additional munitions other than the 3.5" rocket motors.
2. the following munitions will be required:

waste item number	description	ESTIMATED quantity required	
		worst case	minimum
143	ign,ctg,M5A2	310,656	97,080
49	50 cal,ball,APM2 w/IMR 5010	128,000	40,000
57	50 cal,incen, M23 w/1M-11	102,032	31,885
120	Det,MK56,model 0	6,009,616	1,878,005
127	Fuze, point-det,M48	50,608	15,815
200	Fuze, M501	3,520	1,100
* 23	*30 cal,M25,tracer,w/WC852	360,000	112,500

3. The quantities are only approximate at this time. Approval by AMCCOM to use materiel at SEAD and/or shipment of other materiel for the Trial Burn should be initiated as soon as possible. POC is the undersigned at 41-450.

Sincerely,

Randall W. Battaglia

MEMORANDUM FOR Commander, Tooele,  
Tooele, UT 84

SDSTE-AED.

SUBJECT: Calibration Requirements for Ammunition Peculiar  
Equipment (APE) 1236M1 Deactivation Furnaces

1. Reference FONECON between Mr. Bruce Maddy, AMSMC-DSM-ME and Ms. Sharon Ricci, SDSSE-RS, 28 Dec 92, SAB.
2. In reference, Ms. Ricci inquired about the items in an APE 1236M1 that might require calibration. The draft (April 1992) preliminary manual does not address the subject, nor was it mentioned on the DA Form 2028 prepared by this office.
3. Request that SDSTE-AED identify any TMDE in the APE 1236M1 that does qualitative or quantitative measurements, or is used for enhancement of health or safety. These items should have calibration requirements identified on DA Form 3758 IAW TB 750-25. These forms should then be forwarded to this office for completion of staffing, and eventual inclusion in TB 43-180. Items for which calibration is not required (such as self-calibration, or reference-only measurements, etc.) should be specifically identified on a DA Form 3758 as "calibration not required."
4. Request also that the subject of calibration be addressed in the new operator and parts manual for the APE 1236M1.
5. The POC is Mr. Bruce Maddy, AMSMC-DSM-ME, DSN 793-8881.

The following statement must be signed by the supervisor or commanding officer who is responsible for the operation which generated the hazardous waste:

I certify under penalty of law that I personally have examined and am familiar with the waste, through analysis and testing or through knowledge of the waste, to support this certification that the waste complies with the treatment standards in Part 376, section 376.4 and all applicable prohibitions set forth in subdivision 376.3(b) of Part 376 or RCRA section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine or imprisonment.

The following statement must be signed by the supervisor or commanding officer who is responsible for the operation which generated the hazardous waste:

I certify under penalty of law that I personally have examined and am familiar with the waste, through analysis and testing or through knowledge of the waste, to support this certification that the waste complies with the treatment standards in Part 376, section 376.4 and all applicable prohibitions set forth in subdivision 376.3(b) of Part 376 or RCRA section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine or imprisonment.

MEMORANDUM FOR RECORD

SUBJECT: Revision of Explosive Weights for M543 Fuze

1. Recently, the Environmental Protection Officer requested that additional research be conducted on the explosive data for the M543 Fuze. The M543 Fuze is the fuze associated with the M424 8-inch projectile. Both items are being destroyed in the FY94 demilitarization program.
2. Review of source material indicated that the data originally listed on the Land Disposal Restriction Internal Notification was in error. Further research conducted by the U.S. Army Research, Design and Engineering Command (at Picatinny Arsenal) provided specific data on explosive compositions.
3. The enclosure represents the revised explosive data for the M543 Fuze. It should be considered the official Internal Notification for the period it reflects, in lieu of individual revised notifications.

MEMORANDUM THRU Chief, Mission Operations Division

FOR Environmental Protection Officer

SUBJECT: Propellant Burn Notification

1. Reference memorandum, SDSTO-SEM-P, 27 Sep 93, subject: Propellant Burns.
2. Referenced memorandum provided the chemical compositions and weights for each increment of the M80 Propelling charge. SEDA is in the process of demilitarizing 8047 each.
3. Burns are scheduled for each day of the period 16 May - 11 Jun, weather permitting. Burn quantity is planned for 145 charges per burn. Two burns will be executed daily whenever possible. Actual daily totals will continue to be listed on the Internal Notification and Certification statements and provided to your office.
4. Point of contact is Mike Warner, X-41441.

The following statement must be signed by the supervisor or commanding officer who is responsible for the operation which generated the hazardous waste:

I certify under penalty of law that I personally have examined and am familiar with the waste, through analysis and testing or through knowledge of the waste, to support this certification that the waste complies with the treatment standards in Part 376, section 376.4 and all applicable prohibitions set forth in subdivision 376.3(b) of Part 376 or RCRA section 3004(d). I believe that the information I submitted is true, accurate and complete. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine or imprisonment.

MEMORANDUM THRU Chief, Mission Operations Division

FOR Environmental Protection Officer

SUBJECT: Propellant Burn Notification

1. Reference memorandum, SDSTO-SEM-P, 27 Sep 93, subject: Propellant Burns.

---

2. Referenced memorandum provided the chemical compositions and weights for each increment of the M80 Propelling charge. SEDA has received final authorization from higher headquarters to demilitarize 8047 each.
3. Burns are scheduled for each day of the period 9 Mar - 8 Apr 94, weather permitting. Burn quantity was planned at 100 charges per burn, but actual operations indicate 140 each will be an effective maximum. It also appears that two burns per day are feasible and will be executed whenever possible. Actual daily totals will continue to be listed on the Internal Notification and Certification statements and provided to your office.
4. Point of contact is Mike Warner, X-41441.

2. Referenced memorandum provided the chemical compositions and weights for each increment of the M80 Propelling charge. SEDA has received final authorization from higher Headquarters to demilitarize 8047 each.
3. Burns are scheduled for each day of the period 9 Mar - 8 Apr 94, weather permitting. Burn quantity is planned at 100 charges per day. If actual operations indicate a need to raise or lower the daily planned quantity, your office will be notified in writing.
4. Given the considerable duration of this program (over 80 shifts), this office will provide notification of burn dates to cover three to four week intervals. However, the copies of the applicable Land Disposal Restriction notification and certification statements will be provided for each day's operation. If this arrangement is not suitable, please coordinate with this office's point of contact.
5. Point of contact is Mike Warner, X-41441.
