Jim,

The DEC has reviewed the Draft 2019 Annual Long-Term Monitoring Report for the OB Grounds at the Seneca Army Depot (Site No 850006), dated April 2020. We support the USEPA's comment from May 11, 2020 on this report and accept the report given that any recommendations carried out are in compliance with the Record of Decision. Please contact me should you have any questions.

Thank You,
Melissa

Subject: Seneca OB Grounds 2019 LTM Report

ATTENTION: This email came from an external source. Do not open attachments or click on links from unknown senders or unexpected emails.

Jim and Beth,

Hope you guys are safe and healthy. EPA has reviewed the Seneca Army Depot OB Grounds 2019 LTM Report. We have one comment on the Report.

An alternative recommendation made in the report is that in the future, the cap and creek inspections would be performed as part of the annual SEDA LUC inspections, and that groundwater sampling at the OB Grounds would be performed every 5 years at the time of the 5-year review. EPA agrees with this recommendation, with the clarification that the cap and creek inspections and groundwater monitoring are still requirements of the OB Grounds ROD. If the Army wishes to do away with the inspections, groundwater monitoring, and groundwater restriction, then an additional decision document such as an ESD would be required.

Please let me know if you have any questions. Thank you. Stay safe and healthy.

Bob
